Convert your heic files to jpg online & free Choose Files Drop files here. 100 MB maximum file size or Sign Up heic to jpg Step 1 Select files from Computer, Google Drive, Dropbox, URL or by dragging it on the page. Step 2 Choose jpg or any other format you need as a result (more than 200 formats supported) Step 3 Let the file convert and you can download your jpg file right afterwards 4.8 (430,700 votes) You need to convert and download at least 1 file to provide feedback! Compress Merge Capture Website Create Archive Extract Archive Convert HEIC Converter HEIF/HEIC is an image file format which encapsulatesHEVC (High Efficiency Video Codec) encoded images. In comparison to JPG, it reduces the file size by up to50%. Starting with iOS11, HEIC is the new standard format for storing images on Apple's mobile devices. JPG Converter JPG, also known as JPEG, is a file format that can contain image with 10:1 to 20:1 lossy image compression technique. With the compression technique it can reduce the image size without losing the image quality. So it is widely used in web publishing to reduce the image size maintaining the image quality. CloudConvert is your universal app for file conversions. We support nearly all audio, video, document, ebook, archive, image, spreadsheet, and presentation formats. Plus, you can use our online tool without downloading any software. CloudConvert is ISO 27001 certified and has been trusted by our users and customers since its founding in 2012. No one except you will ever have access to your files. We earn money by selling access to our API, not by selling your data. Read more about that in our Security Overview. Besides using open source software under the hood, we've partnered with various software vendors to provide the best possible results. Most conversion types can be adjusted to your needs such as setting the quality and many other options. Our API allows custom integrations with your app. You pay only for what you actually use, and there are huge discounts for high-volume customers. We provide a lot of handy features such as full Amazon S3 integration. Check out the CloudConvert API. Wait a few seconds Download converted files or save them to your cloud storage Please note that output files will be automatically deleted from our server in one hour. Download them to your computer or save them to your Google Drive or Dropbox. You can also scan the QR code of the image to instantly save converted file(s) to your mobile device. Convert your MacOS and iOS photos online to widely used JPEG or PNG without compromising quality or changing your workflow! With our file converter, you can take up Apples new HEIC (HEIF) format without worrying about compatibility with other devices or software. Nowadays, JPEG is present in every image workflow, from image editors social networks, browsers, email clients, and virtually every piece of hardware or software that can show pictures. JPEG is an open file format standard and still the most popular image format on the web. Moreover, HEIF and HEVC are clouded by expensive patent licensing concerns, which means there could be legal implications to implementing HEIF support, particularly in paid software or a hardware product. If you prefer an offline solution rather than an online service due to security or other reasons we suggest using DocuFreezer. It is a tried-and-true bulk image converter that can seamlessly convert multiple files to JPEG format (and other popular formats). This program offers more settings to adjust the parameters of output JPEGs, for example, changing color mode (CMYK, RGB, RGB/A, Grayscale, etc.), watermarking, compression, and more. It is a great tool, especially if you want to convert many pictures or documents at once. Learn more and download DocuFreezer If you have multiple pictures to process, simply select and drop HEIC files or folders containing HEIC images onto the browser window. Our online converter will process them all at once and give you a unique download link and options to save converted files to your computer or cloud storage. We care about privacy. All uploaded files will be deleted from our servers forever after one hour. We do not use your files in any way and do not give access to them to any third parties. The only things we keep in our database for internal analysis are file names and types of file conversion. No personal data is being stored, collected, or transferred. Our service maintains a secure IT environment and has appropriate measures to prevent unauthorized access to your data. Thank you for trusting us. Just select one or multiple files on your computer or dragndrop them to start file conversion. Yes, its that easy. Set output file image quality, resolution (DPI), resizing, cropping, compression, and other parameters. Batch process multiple iPhone or iPad pictures at a time no need to manually add each file one by one. Most cameras embed hidden information, called metadata, into every photograph taken. With our converter, you can remove EXIF metadata from your iPhone pictures to save more storage space on your device. We make sure your images uploaded to our website are safe and secure. After conversion, the unique URL becomes invalid after one hour, and files are deleted from our server within 24 hours. Maintain good quality of converted files, while preserving their full resolution and quality your photos will keep original DPI and dimensions after being converted to JPEG or PNG. No software to download just select your file, upload it and get JPG or PNG as a result! We dont need your e-mail, name, location, or any other personal data. We collect only file names and associated types of file conversions for each uploaded file. Quickly download converted files by clicking a direct link (URL), saving them to your cloud storage, or scanning a QR code with your mobile device. HEIC files are created by the camera applications of modern iPhone and Android devices, and professional digital cameras. In June 2017, Apple announced the support for HEIF in macOS High Sierra and iOS 11.JPEG compression is used in a number of image file formats. This format is used in many digital cameras. It is a popular method of lossy compression for digital images. The degree of image compression can be altered, allowing to have control over file size and image quality. A JPG cant have a transparent background so they always have a solid background.PNG is an extensible file format for the lossless storage of raster images. Compared to JPEG, PNG can have a transparent background and is generally larger and higher quality. PNG is often used to save logos, icons and other images where a transparent background is preferred.Uniform Type Identifier (UTI)public.heif, public.heicpublic.jpegpublic.pngStandardISO/IEC 23008-12ISO/IEC 10918, ITU-T T.81, ITU-T T.83, ITU-T T.84, ITU-T T.86ISO/IEC 15948, IETF RFC 2083WikipediaHEIF on WikipediaJPEG on WikipediaPNG on Wikipedia With the latest iOS updates, the iPhone camera will now take pictures in a new HEIC format rather than JPEG. This camera formatting change to HEIC came in iOS 11, but some iPhone users may prefer to have their camera continue to snap photos in JPEG format. Batch conversion from HEIC to JPG is requested by users, since JPEG allows more compatibility with sharing, copying to a computer, etc. and is generally a more widely used format. Need your iPhone pictures to be captured and stored as JPEG? Heres how! Launch Settings from your home screen and go to Camera Choose Formats and select Most Compatible to shoot photos in JPEG format on iPhone camera Exit the Settings Print Conductor is a powerful printing software that will help you a large number of files, including HEIC (High Efficiency Format) images. This software has many advantages, and the biggest one is that it allows printing of multiple images, documents, Excel sheets, CAD drawings, and more all at once. Learn more and download Print Conductor You can switch back to JPEG directly in your device camera settings. Follow these steps to be able to shoot JPEG photos instead of HEIF photos: Launch Settings from your home screen. Go to Photos. Select Automatic (option under Transfer to Mac or PC).You can convert HEIC images to JPEG or PNG file format. Currently, images in HEIC and HEIF format are supported.Our online converter supports JPEG and PNG as output formats. HEIF is short for High Efficiency Image Format. HEIF uses video compression technology called HEVC (High Efficiency Video Coding). It is a standard developed by MPEG, the committee who developed all of the standard video compression technologies MPEG-1, MPEG-2, MPEG-4, H.264/AVC, and the newest codec HEVC also known as H.265. Images are compressed as HEIF, which is saved with extension .heic. In addition, HEIF can be used to capture iPhone burst photography (multi-exposure shots), live photos, and more.HEIC file is a raster image saved in the High Efficiency Image Format (HEIF). HEIC is a format that contains one or multiple HEIF image sequences. Released on September 19, 2017, mobile operating system iOS 11 introduced it as the new alternative to the default image format for iPhone. Apple Inc. announced that it was replacing JPEG files with this new image format. It has a more advanced and modern compression algorithm which allows digital photographs to be taken in smaller file sizes, and retain much higher image quality than JPEGs. The Exchangeable image file format (EXIF) is a standard that defines the formats of image, audio, and metadata tags used by cameras, phones, and other digital recording devices. Exif metadata, which can be found if you open image files properties, includes a range of settings such as ISO speed, shutter speed, aperture, white balance, camera model, date and time, lens type, focal length and more.JPEG (.jpg or .jpeg, file extension) stands for Joint Photographic Experts Group, named after a committee of developers who created it. It has become the standard image format nowadays due to its compression capability. It is still a popular image format over the web, commonly used for photographs and other image types.The Portable Network Graphics (PNG) format was designed to replace the older and simpler GIF format and, to some extent, the much more complex TIFF format. PNG is an open file format for the lossless storage of raster images. PNG provides a patent-free replacement for GIF and can also replace many common uses of TIFF. Indexed-color, grayscale, and truecolor images are supported, plus an optional alpha channel for transparency.You can do it with our other web service Online Image Converter at online-image-converter.com. Besides converting between different formats, it can perform editing operations such as resizing, rotating, cropping images, and adding various effects in batch mode. Convert HEIC to JPEG The HEIC format is a new image file format that Apple announced with the release of the iOS 11 platform in 2017. Today HEIC is one of the standard image formats on the iOS operating system and is gradually replacing the well-known JPG. Compared to other image formats, it has a smaller file size and higher image quality. The new algorithm supports working with transparency, as well as creating one file from different images - HEIC is not just a format, but also a container, which made it possible to store several photos and even videos inside one file. The JPG format is perhaps the most popular among the photo image formats. There are many applications that support viewing and editing JPG files and work on almost all modern operating systems. In addition, this format is supported by the vast majority of imaging devices. JPEG files use a lossy compression method that can significantly reduce file size without significantly compromising quality. Files with the .jpg extension support over 16 million colors (TrueColor system) in RGB, which is capable of providing 24-bit / pixel color depth. At FreeConvert, we go beyond just converting fileswe protect them. Our robust security framework ensures that your data is always safe, whether you're converting an image, video, or document. With advanced encryption, secure data centers, and vigilant monitoring, we've covered every aspect of your data's safety. Learn more about our commitment to security Easily convert HEIC to JPG with the best free online HEIC to JPG converter tool that helps to instantly convert bulk HEIC images into JPG format with a single click. The HEIC to JPG Converter is a free online tool designed to quickly convert bulk HEIC images into JPG format with just single click. It allows users to upload up to 25 images at a time, ensuring fast and efficient conversion. Your images are processed instantly, and no files are stored on the server, ensuring privacy and security. Select Images: Click the "Add File(s)" button to upload your HEIC images. You can upload up to 25 images per session. Convert Images: Press the "Convert Images" button to start the conversion process. The tool will automatically convert all selected images. Download: Once the conversion is complete, click the "Download All Converted Images" link to download the images in a ZIP file. Batch Conversion: Convert up to 25 images simultaneously, saving time and effort. Easy to Use: Simple and intuitive interface with a straightforward conversion process. No File Storage: Images are processed instantly, and no files are stored on the server, ensuring your privacy. Secure: The tool operates directly in your browser, with no need to download any software. 2025 ImageFileSize.com . All rights reserved. UPLOAD FILES HEIC is a new image format. It is popular among iPhone users thanks to Apple adopting the format with iOS 11 in 2017. Technically, HEIC images appear within HEIF containers, although the terms do get sometimes used interchangeably. Regardless, a HEIC file contains a single compressed image made up of a pixel grid. A JPG is similar to a HEIC. The JPG format is older but is far more prevalent than HEIC. However, the benefit of HEIC is that it can be about half the size of a JPG while containing the same perceived image quality. This attribute alone is why Apple is betting big that HEIC could overtake the JPG format in popularity someday. Why should you convert HEIC to JPG? Since HEIC is such a new format, many applications and websites dont support it. Meanwhile, nearly every application and website you find will support JPG. This alone is reason enough to want to convert HEIC to JPG. Likewise, you might want to share a HEIC image with a friend or family member. If that person has an older phone or computer, there is a possibility they wont even be able to view that image. You could convert that HEIC to JPG to save them the hassle of needing to perform the conversion themselves. Convert HEIC to JPG: How to do it If youre ready to convert HEIC files to JPG files, the steps couldnt be simpler. The tool on this page can perform as many conversions as needed for free. You dont need to sign up for anything or give us your email. You also dont need to worry about receiving watermarked images, as our system doesnt do that. First, hit the UPLOAD FILES button and navigate to one or up to 20 HEIC files. If youre on a computer, you can also drag and drop your images onto the Drop Your Files Here field. When your files are uploaded, the conversion automatically begins. You can watch in real time as our server turns the HEIC image into a JPG. When its done, youll see a DOWNLOAD button. Hit that and youll get your JPG. If youve uploaded more than one image, you can wait until all the images have finished converting. Once that happens, hit the DOWNLOAD ALL button to get a ZIP file containing all your converted JPGs. Ready to convert some more? Just hit the CLEAR QUEUE button and repeat the steps. Our tool will remain free no matter how many times you use it. Is this HEIC to JPG converter tool safe? Our conversion service is completely safe and secure. The tool is fully automated, so no one will see the images you upload or the conversions our server creates. Additionally, the server deletes all uploads and conversions after one hour, so you know your images wont be preserved. Also, you dont need to worry about losing your original HEIC images. Those files remain safe on your phone or computer. Should you need them again, they will be there!
